

AUSTRALIAN JOBS

FINDING A JOB

The first step on the road to employment is to find out what jobs are available. But where are jobs listed? Employers often use a number of methods to find candidates and below are some of the most common methods used.

72%

Internet

Many employers use the internet to advertise jobs. This includes their own company website, or job search websites like Australian Job Search.

of jobs are advertised on recruitment and company websites

HOT TIP

Tailor your resume and application for each different job you apply for. This helps you stand out from others who may use the same resume and application every time.

4%

Newspapers

Don't forget about the humble newspaper – some employers still advertise their job openings in the classifieds section.

of jobs are advertised in newspapers

HOT TIP

Keep an eye out for jobs posted in your local newspaper, especially if you live in a regional area.

Not all jobs are advertised! Don't forget to approach employers directly as well!

Social media

More and more employers are using social media to hire workers. Look out for ads posted on business pages or in Facebook job groups.

of jobs are advertised on social media

24%

HOT TIP

If you are contacting an employer or business for work on Facebook, make sure your public profile is presentable! Employers often look at profiles to review potential employees.

Ask friends, family and former co-workers if they know of any work available.

Word-of-mouth

Employers often ask people they know to 'spread the word' about an available position, or even ask current staff if they know someone who would fit the role.

of jobs are promoted by word - of- mouth

29%

HOT TIP

Meeting and talking to employers is a chance to make a good impression. Showing enthusiasm in person gives you a better chance at a job over someone who simply drops off their resume.

Approach employers

Many job seekers approach employers to ask if they have any jobs open or to drop off their resume. Employers often consider these job seekers for current or future opportunities.

WHAT YOU OFFER

CORE COMPETENCIES

Core competencies are the basic building blocks common across most occupations and industries. They decide a set of non-specialist skills gained in early life and schooling and provide a base to further develop skills and specialties. Popular terms for these include 'foundation skills', 'common skills', 'soft skills', 'core skills', 'employability skills' and '21st century skills'.

Employers often place a high value on these as they want someone who will be a good fit for their business. While you can gain these skills through work experience, they are not job-specific, cover a range of personal qualities and skills, and transfer across different occupations and industries.

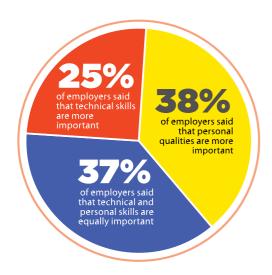

CORE SKILLS

21ST CENTURY SKILLS

Research by the NSC highlights the importance of these skills, showing that three quarters of employers consider personal qualities at least as important as, if not more than, technical skills.

Even though all employers are unique and place emphasis on different attributes, they will not compromise on employability skills specific to their job requirements. Feedback from employers shows that they can teach someone to use a machine, for example, but they cannot teach someone to be reliable or have good communications skills.

YOU NEED AN EXCELLENT RESUME AND JOB APPLICATION

Your resume and application are often your first chance to market yourself to potential employers.

To improve your chances of reaching the next stage in the recruitment process, your application will need to stand out.

How do you do this?

- Research the business and job. This will help you tailor your application and show your interest in the position.
- Ring the employer and ask questions about the job and the business.
 This will help you understand the position and also demonstrates your enthusiasm and means the employer may remember you and look out for your application.
- Be succinct. Your application and resume should be around 1-2 pages each.
- If possible, include examples from your current job, work history or extracurricular activities and explain how these directly relate to the position on offer.
- Double and triple-check that there are no spelling or grammatical errors in your application.

TAILOR YOUR APPLICATION TO EACH JOB

Every job and business is different, so write your application specifically for each job. Do not fall into the trap of using generic applications: imagine what an employer would think if they receive an application suited to a role as a sales representative when their position is for an apprentice refrigeration mechanic.

Employers want the right match for their business and showing that you have read the job description carefully and researched their organisation will help set you apart from other candidates.

More advice on writing resumes and job applications can be found at workforceaustralia.gov.au.

DIGITAL JOB APPLICATIONS

Applying for a job has changed – the COVID-19 pandemic has seen employers and businesses implement new technologies in their recruitment practices. Video interviews have become the norm and, with flexible working arrangements, you can apply for jobs outside of your immediate location.

Here are some tips that may help you land a job online:

- Make sure you read all instructions carefully, so you don't miss any steps.
- Check that all information and responses for online applications are well thought out and don't have any spelling or grammar mistakes.
- Make your resume software friendly by using a simple format and clearly addressing any selection criteria and required skills.
- Some employers will do an online search for your name or look at your social media profile, so consider reviewing your digital presence to ensure it is appropriate.
- Be prepared for video interviews know where to find a good internet connection and professional backdrop and make the most of the time available for each question. Also dress professionally – a good rule is to dress as you would for an interview in-person.

EMERGING AND TRENDING SKILLS

By understanding which skills are emerging and trending in the labour market, we can identify how jobs are changing and which new jobs are emerging.

Trending skills are defined in the Australian Skills Classification for more information) as skills that have grown in demand over the past five years in a particular occupation. These are not necessarily new skills, but skills that are increasing in demand as a proportion of all jobs advertised for that occupation over a five-year period.

Emerging skills are trending skills that are also new to particular occupations in the Australian Skills Classification. These are distinct from other trending skills in that they have recently emerged in some occupations where they

were not previously identified in job advertisements for that occupation within the last five years.

Emerging and trending skills exist across many occupations, highlighting the need for ongoing skills development for all Australians. Analysis using the Australian Skills Classification has found that digital skills are amongst the fastest growing skills in the economy and developing a proficiency in digital skills will be critical for all occupations, not just those at high skill levels.

- Microsoft Visio

SKILLS FOR THE FUTURE

SKILLS ARE KEY

The COVID-19 pandemic has caused large-scale disruption to Australian businesses, workplaces and jobs. Even as the Australian economy recovers, we are likely to see more workforce transitions due to increased digitisation. technological adoption and ongoing structural changes.

In these times of global uncertainty and change, skills are key. The Australian Skills Classification explores the connections between skills and jobs. (www.jobsandskills.gov.au/work/australian-skills-classification) The Classification identifies three categories of skills for Australian occupations:

- Core competencies: these are skills commonly used in all jobs to varying degrees of proficiency (sometimes called 'employability skills').
- Specialist tasks: these describe the day-to-day work within an
- Technology tools: technologies, such as software or hardware, used within an occupation.

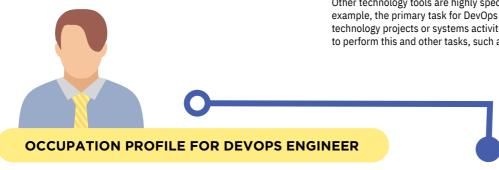

The Classification also includes skills clusters, where similar skills are grouped together. These clusters show the connections and relationships that exist between skills across the labour market. The Australian Government provides a range of other job matching tools and resources to help young people and existing workers skill and reskill themselves for jobs and careers that are in demand. More information about these tools can be found at yourcareer.gov.au.

WHAT TYPES OF SKILLS WILL BE IN **DEMAND?**

When applying for jobs, remember to emphasise your core competencies (i.e. employability skills), rather than just the technical skills you may have. Oral communication, teamwork, problem solving, and initiative and innovation are required for all jobs, and this will continue to be the case in the future. These skills are also highly valued by employers across all sectors, as they are necessary in every job.

We also know it is important to have the skills that help you work with technology. Almost all jobs will require the use of at least one technology tool. Several technology tools are so universal that they are likely to be used by most, if not all jobs. These common technology tools include using the internet, sending emails, texts or instant messages, and video conferencing.

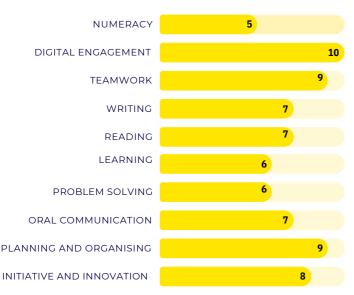

Other technology tools are highly specialised and are specific to a job. For example, the primary task for DevOps Engineers is managing information technology projects or systems activities but technology tools support them to perform this and other tasks, such as using project management software.

261316 DevOps Engineer

Facilitate and undertake communication, collaboration. integration and automation to improve efficiency and workflow across different specialist IT teams.

CORE COMPETENCIES

SPECIALIST TASKS

- Manage information technology projects or system activities
- Direct organisational operations, projects or services
- Develop software applications
- Communicate technical information to suppliers. contractors or regulatory agencies
- Coordinate operational activities with external stakeholders

- Application server software
- Business intelligence and decision support software
- Configuration management software
- Database management software
- Enterprise application integration software
- Project management software
- Software development and programming languages

CAN SKILLS GAINED IN ONE JOB BE TRANSFERRED TO ANOTHER JOB?

Many jobs have a similar set of skills. If you are looking for work or needing to change jobs, the good news is that you are likely to have many transferable skills. Identifying your transferable skills can open a broad range of job opportunities. The Australian Skills Classification can improve job matching by linking the skills required in one job to another. The Classification identifies the work activities or specialist tasks a person undertakes specific to a job. You can use the specialist tasks in the Classification to describe your full range of skills including relevant skills picked up through work experience, formal education and on-the-job training. Occupation profiles also provide a clearer understanding of employers' skill needs and the transferable skills you may have.

WILL TRAINING AND QUALIFICATIONS BE NECESSARY?

There are many pathways to work, and it is important to make decisions based on your own strengths. In a competitive labour market, training and qualifications matter. It also helps to understand the skills you acquire through your education, training and work experience.

You can use the Government's resources, like Your Career, to identify your transferable skills and address skills gaps. These resources also identify local labour market trends and opportunities — so you know your training and qualifications will lead to ongoing work.

Skills development and lifelong learning will expand your opportunities as some jobs change, new jobs emerge, and technological progress continues. For more information see yourcareer.gov.au.

WHAT IF I DON'T COMPLETE FURTHER EDUCATION?

Although most new jobs created in recent years (and those expected in the future) are in skilled occupations, there will continue to be large numbers of jobs in lower skill level occupations (that is, jobs which do not usually require post-school qualifications). Lower skill level occupations generally have higher turnover rates than those which require post-school qualifications and many job openings are available each year across all industries.

Significant proportions of Labourers (60%), Sales Workers (56%) and Machinery Operators and Drivers (53%) do not hold post-school qualifications. This includes occupations like General Sales Assistants, Waiters and Checkout Operators and Office Cashiers.

There are opportunities in all industries for people who do not have post-school qualifications. For example, more than half of the jobs in Accommodation and Food Services and Retail Trade are held by workers who do not have such qualifications.

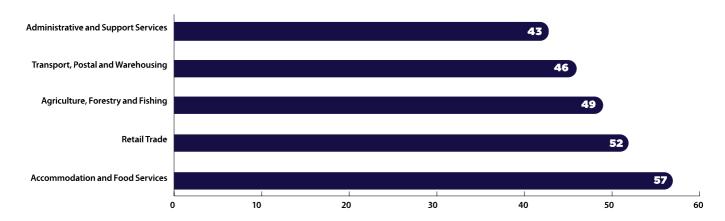

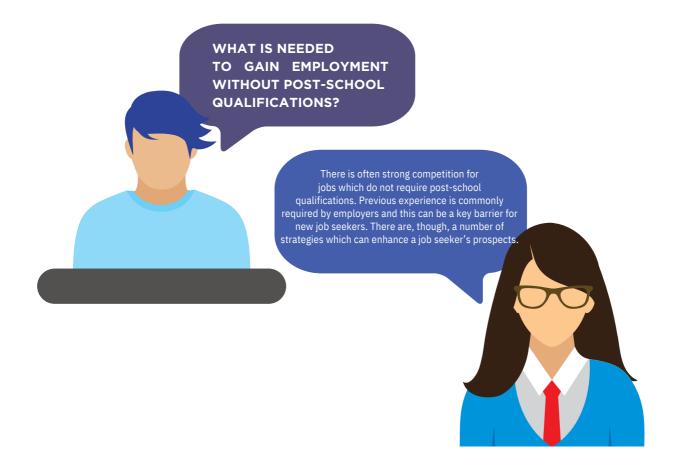

Figure 3: Proportion of workforce without post-school qualifications, top 5 industries, 2021 (%)

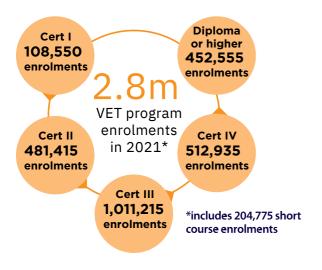

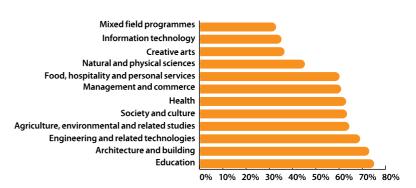

VOCATIONAL EDUCATION AND TRAINING

The VET system provides a skilled workforce with nationally recognised qualifications and knowledge-based competencies. Students can enrol in qualifications (with around 1,800 on offer), accredited courses, industry recognised skill sets and units of competency, allowing them to gain the specific skills they need, when they need them. Training takes place in classrooms, workplaces and online, and can be full-time or part-time.

Graduates in 2020 in the fields of Education and Architecture and building commonly reported employability benefits from their study, with more than 70% of these graduates stating they improved their employment status after training.

Information technology and Creative arts graduates reported the least improvements in employment status after graduating (35% and 36% respectively).

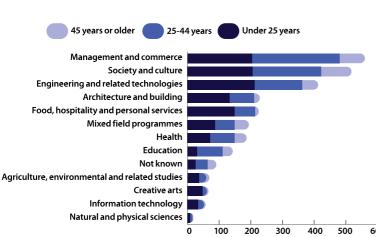

In 2021, most VET program course enrolments were in the Management and commerce and Society and culture fields of education.

There were 4.3 million VET students in 2021, and around half of these students (2.7 million) were not enrolled in a full course. This study (officially referred to as nationally accredited stand-alone subjects) includes training that is critical to supporting employers and the Australian economy. Examples include enabling employers to meet workplace and public health and safety requirements, such as "construction white cards" for building sites, responsible service of alcohol and first-aid certifications.

VET program enrolments only counts enrolments in full programs, including short courses. As some students enrol in stand-alone subjects, there are more VET students then course enrolments.

DO VET GRADUATES HAVE HIGH EARNINGS?

Workers who hold a VET qualification at the Certificate III or higher level generally earn more than those who have not studied after leaving school (see page 12). In 2021, the median annual income for VET Graduates, at the Certificate II level or higher, working full-time after completing their training was \$57,400. The highest median salaries were for those who studied:

- Education (\$67,100)
- Management and commerce (\$61,100)
- Engineering and related technologies (\$61,000)

Level of education	Improved employment status after training (%)	Median annual income (\$)
Diploma and above	69.0	68,800
Certificate IV	68.0	70,000
Certificate III	63.6	52,200
Certificate II	49.5	41,700

Figure 3: VET employment outcomes after graduation, 2021

EDUCATION IMPROVED THEIR
EMPLOYMENT STATUS
AFTER TRAINING

HIGHER EDUCATION

Universities offer courses at the undergraduate and postgraduate levels, including associate degrees, bachelor degrees, masters and PhD qualifications. The vast majority of students study at the bachelor degree level (62.1% in 2021). Higher education usually involves a commitment to at least three years of full-time equivalent study to attain a bachelor degree, but many courses involve longer periods of education

There were 1.6 million students enrolled in higher education in 2020 (up by 32.9% over the past decade).

WHAT SUBJECT AREAS ARE AVAILABLE?

The higher education sector provides training in all fields of education, but one of the largest numbers of enrolments are in Society and Culture (343, 667 enrolments in 2020), which is a diverse field of education including studies in law, psychology, human welfare and society, language and linguistics, economics and sport and recreation.

Further information on higher education enrolments can be found at education.gov.au/higher-education-statistics.

	2020 enrolments ('0 0 0)	10 year change (%)
Natural and Physical Sciences	137	46.09
Information Technology	121	145.61
Engineering and Related Technologies	118	33.18
Architecture and Building	43	50.75
Agriculture, Environmental and Related Studies	22	16.29

Society and Culture	344	28.47
Creative Arts	98	14.89
Food, Hospitality and Personal Services	0.3	-62.6
Mixed Field Programmes	13	62 .9 8
Non-award courses	16	-20.62
All	1, 705	33

Figure 1: Higher Education enrolments, by field of education.

The data takes into account the coding of Combined Courses to two fields of education. As a consequence, counting both fields of education for Combined Courses means that the totals may be less than the sum of all broad fields of education.

HIGHER EDUCATION GRADUATE EMPLOYMENT OUTCOMES

Higher education graduates generally have strong employment outcomes, especially as graduates gain experience in the labour market. In 2021, 85 per cent of undergraduates were employed four months after completing their degree. For graduates who had completed their degree three years earlier in 2018, 92 per cent were employed in 2021.

Vocationally oriented study areas (such as Rehabilitation, Pharmacy, Teacher Education and Engineering) generally have stronger employment outcomes immediately after graduation. Graduates with more generalist degrees (such as Humanities, culture and social sciences or Science and mathematics) have weaker employment outcomes immediately after graduation, but they do improve significantly over time.

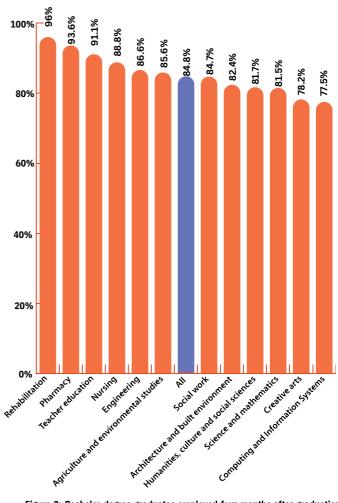

Figure 2: Bachelor degree graduates employed four months after graduation, selected fields of education, 2021 (%)

SALARIES

In 2021, the median annual full-time starting salary for an undergraduate was \$65,000. Study areas with the highest median salaries included:

- Dentistry, \$100,000
- Medicine, \$76,000
- Teacher education, \$72,000
- Engineering, \$70,000

Postgraduate coursework graduates had a median salary of \$89,700 and for postgraduate research graduates it was \$95,000.

JOBS BY LOCATION

NEW SOUTH WALES

New South Wales is the largest employing state in Australia. Most jobs are in Sydney, which accounts for almost 70% of the state's employment. The largest employing industry in New South Wales is Health Care and Social Assistance, followed by Professional, Scientific and Technical Services. Retail Trade, Construction and Education and Training are also major employing industries in this state.

Around 72% of the state's workforce has post-school qualifications and they are more likely to hold a bachelor degree or higher than workers nationally. Sydney has the most highly educated workforce in the state, with 74% holding post-school qualifications (including 47% with a bachelor degree or higher). There are multiple regions, however, where it is far more common for workers to have VET qualifications rather than those gained through a university (such as the Murray where 44% of the workforce has a certificate III or higher VET qualification).

The age profile of this state is largely in line with the national average, although some regions have relatively large shares of workers aged 15 to 24 years. These include the Illawarra and Richmond-Tweed. Self-

employment may also offer an opportunity for work, or a different career path. Around 18% of New South Wales workers are their own boss.

Current conditions

Labour market conditions have been strong in New South Wales over the last year, despite the significant disruption caused by the outbreak of the COVID-19 Delta variant in the second half of 2021. Employment increased by 117,300 (or 2.8%) over the year, to stand at a record high in June 2022. The increase in employment over the year was due, entirely, to a surge in full-time employment, up by 136,700 (or 4.7%), to a record high in June 2022, while part-time employment decreased by 19,400 (or 1.6%) over the year. Against the stronger backdrop, the state's unemployment rate declined significantly, from 5.0% in June 2021, to 3.3% in June 2022, the lowest rate recorded since the inception of the monthly series in February 1978 and below the national rate at that time, of 3.5%. Moreover, the state's participation rate increased over the year, by 0.1 percentage points, to 66.0% in June 2022, although it remains below the 66.8% recorded nationally.

Reflecting the strong overall labour market conditions in the state, the youth labour market in New South Wales has also improved somewhat over the last year, with youth employment increasing by 6,600 (or 1.1%), although it remains 21,600 (or 3.5%) below the level recorded in March 2020. It is worth bearing in mind that the overall fall in youth employment since the onset of the pandemic has occurred in conjunction with a substantial decline in the youth civilian population (of 49,600 or 4.9%) since March 2020, due, in large part, to international border closures. The state's youth unemployment rate fell sharply, from 12.4% in June 2021, to 9.0% in June 2022, the lowest rate recorded since January 1979 (earliest available 12-month average original data). The fall in the state's youth unemployment rate over the period, however, occurred in conjunction with a 0.8 percentage point decrease in the youth participation rate, to 67.4% in June 2022.

NSW job advertisements have rebounded strongly as the economy has recovered after sustained lockdowns and associated restrictions in the later half of 2021, with job advertisements as measured by the Internet Vacancy Index rising by 22.5% in the year to June 2022.

Employment

New South Wales

Australia

VICTORIA

Victoria is Australia's second largest employing state, with around 3.5 million workers. Almost 80% of employment is concentrated in Melbourne. The largest employing industry in Victoria is Health Care and Social Assistance, followed by Professional, Scientific and Technical Services. Construction, Retail Trade and Education and Training are also major employing industries in this state.

Most Victorian workers (almost 70%) have a certificate III or higher qualification, including a bachelor degree or higher. Workers in Melbourne are more likely to hold a bachelor degree or higher than those in regional Victoria, where a certificate III or higher VET qualification is relatively more common.

Part-time work accounts for around a third of the state's total employment. Workers in both Latrobe - Gippsland and Hume are the most likely to be employed in this manner (40% and 39% are part-time workers respectively). A full breakdown of part-time work across the state is available in the table below.

The size and diversity of the Victorian labour market means employment opportunities continue to exist across all industries. Employers need workers who are resilient, proactive and capable and, if you are able to demonstrate these attributes, you will stand out from the crowd. Digital skills are also important, with continued enhancements in technology affecting jobs and society more broadly. For more information on skills in the future,

Current conditions

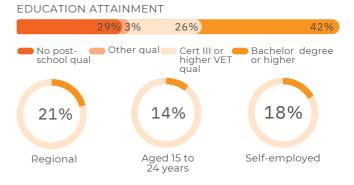

Labour market conditions have strengthened considerably in Victoria over the last year, despite the significant disruption caused by the outbreak of the COVID-19 Delta variant in the second half of 2021. Employment increased by 103,500 (or 3.0%) over the year, to stand at a record high in June 2022.

The increase in employment over the year was due, entirely, to a surge in full-time employment, up by 121,900 (or 5.2%), to a record high in June 2022, while part-time employment decreased by 18,400 (or 1.7%) over the year. Against the stronger backdrop, the state's unemployment rate declined significantly, from 4.5% in June 2021, to 3.2% in June 2022, the lowest rate recorded since the inception of the monthly series in February 1978 and below the national rate, of 3.5%. Moreover, the state's participation rate increased strongly over the year, from 66.2% in June 2021, to 67.1% in June 2022, and is now well above the rate recorded nationally, of 66.8%.

Conditions for youth in Victoria have also strengthened over the year, with youth employment increasing by 29,600 (or 6.6%), although it remains 31,800 (6.2%) below the level recorded in March 2020. It is worth bearing in mind that the overall fall in youth employment since the onset of the pandemic has occurred in conjunction with a substantial decline in the youth civilian population (of 68,800 or 8.0%) since March 2020, due, in large part, to international border closures. The state's youth unemployment rate fell sharply, from 14.0% in June 2021, to 10.3% in June 2022. The fall in the state's youth unemployment rate occurred in conjunction with a significant increase in the youth participation rate, of 3.4 percentage points, to 67.2% in June 2022, the highest rate recorded since June 2012.

There has been strong growth in recruitment activity in Victoria, with job advertisements 35.9% higher in June 2022 than twelve months prior, reflecting a sustained resurgence following a period of extended lockdowns in late 2021.

QUEENSLAND

Queensland is the third largest employing state in Australia, with around half the jobs located in Brisbane and a further 14% in the Gold Coast area.

Given the size and diversity of the Queensland economy, employment opportunities exist across all industries. Health Care and Social Assistance is the largest employing industry in Queensland, with 17% of the state's employment. There are many roles within this industry that do not require medical qualifications or extensive prior experience. Some of these include Receptionists, General Clerks and Kitchenhands.

Construction is another large employer, representing around 9% of total employment.

Workers in Queensland are less likely to hold a bachelor degree or higher than the national average, but are more likely to have a certificate III or higher vocational qualification. The proportion of females employed in this state is consistent with the national average and around one in three Queensland workers are employed part-time.

Around one in six employed Queenslanders are working as their own boss. If you are interested in running your own business, on the government programs which may help you reach your self-employment ambitions.

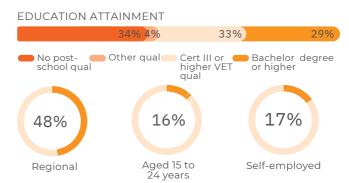

Current conditions

Labour market conditions have strengthened considerably in Queensland over the last year, with employment increasing by 123,000 (or 4.6%), to stand at a record high in June 2022. Encouragingly, the increase in employment over the year was due, predominantly, to a surge in full-time employment, up by 86,700 (or 4.7%), while part-time employment increased by 36,400 (or 4.4%), to a record high in June 2022. The significant increase in employment pushed the state's unemployment rate down, from 5.2% in June 2021, to 4.0% in June 2022, although it remains above the national rate at that time, of 3.5%. Moreover, the state's participation rate increased strongly over the year, from 66.7% in June 2021, to 67.4% in June 2022, the highest rate recorded since October 2011 and above the 66.8% recorded nationally.

Conditions for youth in Queensland have also improved considerably over the year, with youth employment increasing by 25,900 (or 6.4%), to a record high of 430,000 in June 2022. The state's youth unemployment rate fell sharply, from 13.6% in June 2021, to 10.1% in June 2022. The fall in the state' youth unemployment rate occurred in conjunction with a 1.4 percentage point increase in the youth participation rate, to 73.4% in June 2022, the highest rate recorded since August 2011.

There has been robust growth in recruitment activity in Queensland, as measured by the Internet Vacancy Index, with job advertisements in Queensland 1.3 times higher (or 33.6%) in June 2022 than they were 12 months prior.

SOUTH AUSTRALIA

South Australia has a relatively small workforce, with around 7% of national employment. Employment is concentrated in Adelaide, which accounts for around 80% of state employment.

While there are employment opportunities available across all industries, around one in four workers are employed in Health Care and Social Assistance or Retail Trade. Information Media and Telecommunications is South Australia's smallest industry, accounting for 1% of employment.

Part-time employment is relatively common in this state, accounting for around 35% of employment (compared with the national average of 31%). The south-eastern area of South Australia has the largest proportion of part-time employment in the state.

South Australian workers are just as likely to hold a certificate III or higher vocational qualification as a bachelor degree or higher (31% of workers). Overall, though, workers are less likely to hold post-school qualifications than workers nationally. Half of workers in Outback South Australia hold a certificate III or higher vocational qualification.

Current conditions

Labour market conditions have strengthened considerably in South Australia over the last year, with employment increasing by 20,500 (or 2.4%), well above the decade annual average rate, of 1.0%. The increase in employment over the year was due, entirely, to a surge in full-time employment, up by 33,400 (or 5.9%), to a record high in June 2022, while part-time employment decreased by 12,800 (or 4.2%) over the year. Against the stronger backdrop, the state's unemployment rate declined, by 1.0 percentage point over the year, to 4.3% in June 2022, although it remains above the national rate at that time, of 3.5%. Moreover, the state's participation rate increased over the year, from 62.7% in June 2021, to 63.0% in June 2022, but is well below the 66.8% recorded nationally.

Encouragingly, labour market conditions for youth in the state also strengthened over the year. Youth employment increased significantly, by 9,200 (or 7.2%), to 137,300 in June 2022, the highest level recorded since June 1991. The state's youth unemployment rate fell sharply, from 14.7% in June 2021, to 9.6% in June 2022, and has not been lower since January 1979 (earliest available 12-month average original data). The fall in the state's youth unemployment rate occurred in conjunction with a significant rise in the youth participation rate, from 70.6% in June 2021, to 72.3% in June 2022, the highest rate recorded since March 2006.

There has been robust growth in recruitment activity in South Australia, as measured by the Internet Vacancy Index, with job advertisements rising by 26.7% in the year to June 2022.

WESTERN AUSTRALIA

Western Australia is the fourth largest employing state (accounting for 11% of the national workforce), with employment mostly located in Perth.

The largest employing industry in Western Australia is Health Care and Social Assistance. Demand for work in this industry is only going to increase given Australia's ageing population. It is worth noting that not everyone employed in this industry is a doctor or a nurse.

Some of the top employing occupations in Health Care and Social Assistance include Receptionists, General Clerks and Kitchenhands. These are all occupations that can be perfect entry level positions and generally require minimal qualifications or prior experience.

Unlike the rest of Australia, a large proportion of Western Australians are employed in the Mining industry (around one in nine workers). Reflecting this, around 50% of total Mining employment is in this state.

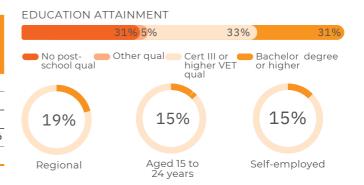

Current conditions

Labour market conditions have strengthened considerably in Western Australia over the last year, with employment increasing by 58,400 (or 4.2%), well above the decade average rate, of 1.2%. The increase in employment over the year was due, entirely, to a surge in full-time employment, up by 73,100 (or 7.7%), while part-time employment decreased by 14,700 (or 3.2%). Against the stronger backdrop, the state's unemployment rate fell sharply, from 5.1% in June 2021, to 3.4% in June 2022, and is below the national rate at that time, of 3.5%. Moreover, the state's participation rate increased over the year, from 68.7% in June 2021, to 69.3% in June 2022, and is well above the national rate, of 66.8%.

Conditions for youth in Western Australia have also strengthened considerably over the year, with youth employment rising by 19,100 (or 9.9%), to 211,800 in June 2022, the highest level recorded since August 2014. The state's youth unemployment rate fell sharply, from 13.3% in June 2021, to 9.1% in June 2022, the lowest rate recorded since July 2013. The fall in the state's youth unemployment rate occurred in conjunction with a significant increase in the youth participation rate, from 69.7% in June 2021, to 73.1% in June 2022.

Reflecting the hard border closures and relative absence of COVID-19 cases, there has been robust growth in recruitment activity in Western Australia, as measured by the Internet Vacancy Index, with job advertisements increasing by 30.0% in the year to June 2022.

TASMANIA

While Tasmania is the smallest employing state, there are employment opportunities available across all industries.

Health Care and Social Assistance is the largest employing industry (accounting for 16% of the workforce), followed by Retail Trade and Education and Training.

Tasmania has the oldest workforce of any state or territory, with 45% aged 45 years or older. Part-time work is also relatively common (37% of state employment, the largest share in Australia). Workers in this state are less likely to have a bachelor degree or higher than the national average, although they are more likely to have completed a certificate III or higher vocational qualification.

Tasmania has the most regionally diverse workforce in Australia, with more than half of all workers employed outside of Hobart.

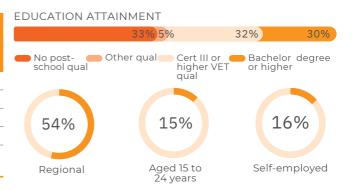

Current conditions

Labour market conditions have improved in Tasmania over the last year. For instance, employment has increased by 3,000 (or 1.2%). The increase in employment has been driven, entirely, by a strong rise in full-time employment, of 9,300 (or 5.8%), while part-time employment decreased over the period, by 6,300 (or 6.3%). The state's unemployment rate declined over the year, by 0.3 percentage points, to 4.3% in June 2022, although it remains above the national rate at that time, of 3.5%. The state's participation rate decreased marginally over the year, to 61.0% in June 2022, and is well below the 66.8% recorded nationally.

Conditions for youth in Tasmania have been mixed over the year, with youth employment in the state increasing by 600 (or 1.6%) over the period, to 38,300 in June 2022. The state's youth unemployment rate declined, from 14.3% in June 2021, to 10.3% in June 2022, and has not been lower since August 2009. The fall in the unemployment rate over the period, however, occurred in conjunction with a 1.9 percentage point decrease in the state's participation rate, to 68.6% in June 2022.

Reflecting the relative absence of COVID-19 cases, there has been robust growth in recruitment activity in Tasmania, as measured by the Internet Vacancy Index, with job advertisements 1.5 times higher (53.7%) in June 2022 than twelve months prior, the strongest growth of any jurisdiction.

NORTHERN TERRITORY

There are around 136,000 workers in the Northern Territory, which is the least of any state or territory. Most are employed in Darwin, with only 37% of the workforce located in regional areas. Around 64% of the Northern Territory's workforce has attained at least a Certificate III or higher qualification. The largest employing industry is the Public Administration and Safety industry, followed by Health Care and Social Assistance. Together they account for more than a third of all workers in the Northern Territory.

Current conditions

Labour market conditions have improved in the Northern Territory over the last year, with employment increasing by 3,500 (or 2.8%), well above the decade annual average rate, of 0.7%, although it remains 5,500 (or 4.0%) below the level recorded in March 2020. The increase in employment was due, entirely, to a significant rise in full-time employment, up by 5,100 (or 5.3%), while part-time employment decreased, by 1,600 (or 5.3%).

Against the stronger backdrop, the territory's unemployment rate declined over the year, by 1.0 percentage point, to 3.7% in June 2022, although it remains above the 3.5% recorded nationally at that time. Moreover, the territory's participation rate increased over the year, by 0.8 percentage points, to 71.1% in June 2022, and is well above the 66.8% recorded nationally.

Encouragingly, labour market conditions also improved for youth over the year. Youth employment increased by 900 (or 5.4%) over the period, to 16,700 in June 2022. Against the stronger backdrop, the youth unemployment rate in the territory fell sharply, from 12.9% in June 2021, to 8.7% in June 2022. The fall in the territory's youth unemployment rate occurred in conjunction with a rise in the youth participation rate, from 60.9% in June 2021, to 61.2% in June 2022.

There has been robust growth in recruitment activity in the Northern Territory, as measured by the Internet Vacancy Index, with job advertisements 1.2 times higher (21.0%) in June 2022 than at the same time in 2021.

AUSTRALIAN CAPITAL TERRITORY

There are about 235,000 workers in the ACT, most of whom (around 30%) are employed in Public Administration and Safety—the highest share of any state or territory. The second largest employing industry is Professional, Scientific and Technical Services, followed by Health Care and Social Assistance. The territory has the most highly educated workers in Australia, with one out of every two workers holding a bachelor degree or higher.

Current conditions

below the level recorded in March 2020.

Labour market conditions have improved in the Australian Capital Territory over the last year, despite the significant disruption caused by the outbreak of the COVID-19 Delta variant in the second half of 2021. Employment increased by 3,600 (or 1.5%) over the year, well above the decade annual average rate, of 1.0%, although it remains 4,200 (or 1.8%)

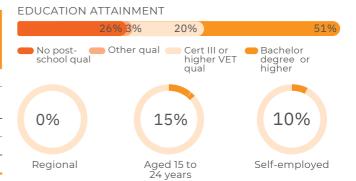

The increase in employment over the year was due, entirely, to a strong rise in full-time employment, up by 5,900 (or 3.4%), while part-time employment decreased over the period, by 2,300 (or 3.8%).

Against the stronger backdrop, the territory's unemployment rate fell sharply over the year, by 1.7 percentage points, to 3.1% in June 2022, and is below the 3.5% recorded nationally at that time. The fall in the territory's unemployment rate occurred in conjunction with a slight fall in the participation rate, from 70.7% in June 2021, to 70.6% in June 2022, although it remains above the 66.8% recorded nationally.

Conditions for youth in the Australian Capital Territory have deteriorated over the year. For instance, youth employment in the territory declined by 1,900 (or 5.4%), to 33,900 in June 2022, and is now 3,700 (or 9.8%) below the level recorded in March 2020. It is worth bearing in mind that the overall fall in youth employment since the onset of the pandemic has occurred in conjunction with a substantial fall in the youth civilian population (of 4,200 or 7.5%) since March 2020, due, in large part, to international border closures. The territory's youth unemployment rate was steady over the year, at 8.3%, while the territory's youth participation rate fell by 2.0 percentage points over the period, to 70.5%.

Job advertisements in the ACT rose by 15.9% in the year to June 2022, the lowest growth of any jurisdiction, despite a period of COVID-19 lockdowns and associated restrictions in the last quarter of 2021.

HEALTH CARE AND SOCIAL ASSISTANCE

EDUCATION ATTAINMENT

Health Care and Social Assistance is Australia's largest employing industry and has a critically important workforce.

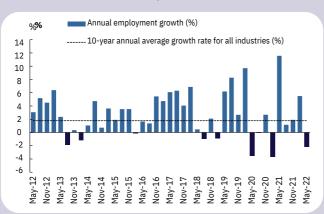

It covers health services like hospitals, General Practitioners, dental and ambulance services, as well as services like child care and aged care. Employment growth in the Healthcare and Social Assistance industry has been strong over the last year.

This industry has a large proportion of part-time workers, with 43% of the workforce employed part-time (compared with the Australian average of 31%). There is also a significant share of female workers in Health Care and Social Assistance (three in every four workers are female).

Workers in this industry are highly educated, with one out of every two workers holding a bachelor degree or higher. This industry has a somewhat older age profile with just 10% of the workforce aged 15-24 years.

Around a third of the Healthcare and Social Assistance workforce is based in regional Australia.

EDUCATION AND TRAINING

EDUCATION ATTAINMENT

	. ,,			
14% 2%	20%		64%)
No post- school qu	Other qual	Cert III or higher VET	Bachelor degree or higher	

Education and Training is one of Australia's largest employing industries, and includes teaching occupations across all levels of schools, as well as University Lecturers and Tutors.

Over the year to May 2022, employment in this industry declined, however, this followed a large gain in employment a year earlier.

Around 72% of the workforce is female, the second highest percentage for any industry within Australia. Part-time work is also relatively common (around 40% of workers). Most people who work in Education and Training have post-school qualifications, with almost two-thirds of workers holding a bachelor degree or higher. Reflecting the time taken to gain these qualifications, only 9% of the workforce is aged 15 to 24. While most jobs need a university degree, lower skilled jobs like Education Aides can provide an employment pathway to enter the industry.

CONSTRUCTION

EDUCATION ATTAINMENT

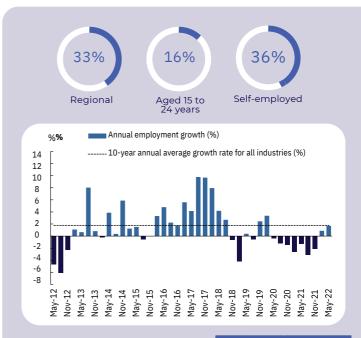

Construction is one of Australia's largest employing industries, with employment opportunities available at all skill and experience levels across the country.

Employment growth in the Construction industry is cyclical, meaning it often has periods of strong employment growth followed by periods when employment in the industry falls.

The Construction workforce is predominantly male and has the lowest percentage of female employment of any industry (13%). The most common entry into this industry is through the completion of an apprenticeship or traineeship, which is reflected in the workforce's educational attainment (more than half of workers possess a certificate III or higher VET qualification). Around one in three workers, though, do not possess any post-school qualifications and 15% of the workforce are Labourers, which suggests there are some good entry level opportunities.

This industry offers plenty of opportunities for self-employment, and more than one in three workers run their own business, the second highest rate of any industry. For information on government programs to help with self-employment,

Employers in this industry may not formally advertise when recruiting. Rather, they may rely on word of mouth or more informal recruitment methods (such as advertising on social media).

No post- Other qual	Cert III or higher VET	Bachelor or highe	r degree r

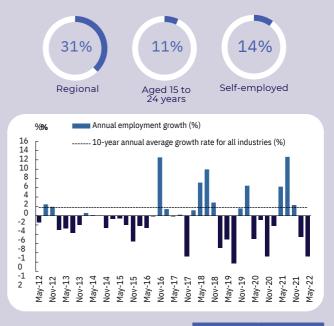

Australia's Manufacturing industry is a very diverse sector and covers the manufacture of food and beverages, petroleum and coal, polymer products, machinery, furniture and more.

While employment in Manufacturing has generally been declining over the last few years, more recently, periods of employment growth have been recorded.

While it is common for workers to hold a certificate III or higher VET qualification, employers in this industry also value trade experience and practical knowledge. This is shown by the sizeable proportion of workers who do not have post-school qualifications (more than a third of the workforce). While over 100,000 young people are employed in Manufacturing, they represent a relatively small part of this industry (11% are aged 15 to 24 years old).

Employment in this industry is typically full-time (83%). There are a range of job opportunities in the Manufacturing industry, across different levels of skill and experience. Most workers in the industry are employed as Technicians and Trades Workers (27%), Managers (18%) or Labourers (17%).

PROFESSIONAL, SCIENTIFIC AND TECHNICAL SERVICES

EDUCATION ATTAINMENT

Professional, Scientific and Technical Services is a large and diverse industry and includes legal and accounting services, veterinary services, and computer system design.

Employment in the Professional, Scientific and Technical Services industry grew solidly over the year to May 2022. Most employment in this industry (over 80%) is concentrated in the capital cities

This is a highly skilled workforce, with two out of every three workers holding a bachelor degree or higher. Reflecting the time it takes to attain the required qualifications, a small share of this workforce is young. Workers in the industry are mostly employed as Professionals (60%). For more information on the Professionals occupation group.

There are opportunities to run your own business within this industry, with around a quarter of the workforce self-employed. While dependent on the role they are performing, workers in this industry often have scope to work remotely.

10% 13% 6% Regional Aged 15 to 24 years Self-employed %**%** Annual employment growth (%) - 10-year annual average growth rate for all industries (%) 14 12 10 8 6 4 2 0 -2 -4 -6 -8 -10 Nov-17 May-18 May-19 Nov-19 May-20 May-21 Nov-21 Nov-16 May-17

EDUCATION ATTAINMENT

20% 1%	20%		59%
No post- Ot school qual	ther qual Ce hig qu	ert III or Bachelor de gher VET or higher aal	gree

Employment in the Financial and Insurance Services industry includes banking, insurance and superannuation funds, as well as financial brokering services.

This industry's workforce grew by 16% over the year to May 2022, the highest rate of any industry in Australia.

Employment is concentrated primarily in capital cities, particularly along Australia's east coast, with 46% of the workforce located in New South Wales. This workforce is a highly qualified, with the majority of workers in this industry holding a bachelor degree or higher (almost 60%).

Almost all jobs are for Professionals, Clerical and Administrative Workers, and Managers. For more information on these occupation groups.

Reflecting the time it takes to attain the required qualifications, a small share of this workforce is aged 15 to 24 years old (just 6%). That said, Bank Workers is one of the largest employing occupations within Financial and Insurance Services and this role generally does not require post-school qualifications and can provide a pathway into the industry.

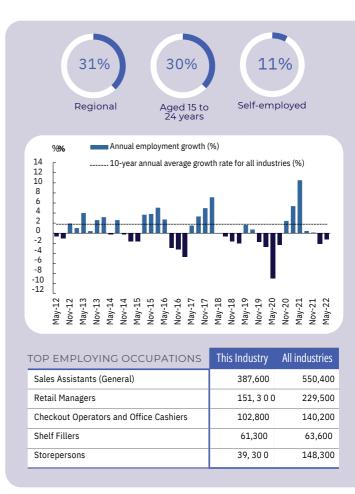

RETAIL TRADE

EDUCATION ATTAINMENT

Retail Trade is Australia's third largest employing industry, and accounts for almost 1.3 million workers. Retail Trade employs more young people than most other industries (30% are aged 15 to 24). This is because entry level roles within the industry generally do not require prior experience or qualifications, with more half the workers having no post-school qualifications.

Many occupations in the industry can also provide flexible hours, allowing work around school and other commitments. It is important to remember that jobs in this industry might not always be formally advertised. When looking for work in Retail Trade remember to ask friends, family and any other contacts if they are aware of any job opportunities. Opportunities might be available by word-of-mouth, or via signs in shop windows and through social media.

WHOLESALE TRADE

EDUCATION ATTAINMENT

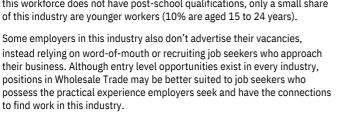

Wholesalers do not usually have a shop front to sell their items; they are the middle step between producers and retailers.

It is one of the smaller employing industries, with employment mainly located in the capital cities along Australia's east coast. That said, one in four working in this industry live in regional Australia.

Employment in the Wholesale trade industry increased slightly over the year to May 2022, following a series of annual declines. While more than 40% of this workforce does not have post-school qualifications, only a small share

instead relying on word-of-mouth or recruiting job seekers who approach their business. Although entry level opportunities exist in every industry, positions in Wholesale Trade may be better suited to job seekers who to find work in this industry.

MINING

EDUCATION ATTAINMENT

Mining is an important industry in terms of its export revenue, but it is a relatively small employing industry (accounting for around 2% of Australian jobs).

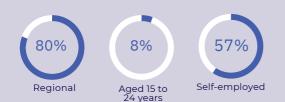

Employment in this industry tends to have periods of strong growth followed by periods when total employment falls. That said, employment in this industry has been growing strongly over the two years to May 2022.

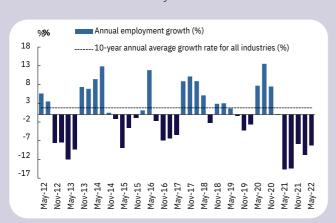

Employment in this workforce is largely concentrated in Western Australia and Queensland, and one in three workers lives in regional Australia. Exploration is a large component of the industry, with Western Australia currently being the major location for minerals exploration. Workers are often expected to travel for work, with fly-in, fly-out (FIFO) arrangements relatively common.

Post-school qualifications are often required to work in Mining. Around 44% of workers hold a certificate III or higher vocational qualifications, and 25% possess a bachelor degree or higher.

Most of the Mining workforce is male, with only around one in five workers being female. That said, more women are working in this industry, with only 12% of the workforce being female two decades ago, compared with 19% now.

Almost 30% of workers are Machinery Operators and Drivers, 26% are Technicians and Trades Workers, and 20% are Professionals. For more information on these occupations.

TOP EMPLOYING OCCUPATIONS	This Industry	All industries
Livestock Farmers	71, 20 0	73,100
Crop Farmers	32,900	38,500
Mixed Crop and Livestock Farmers	24,600	29,300
Livestock Farm Workers	22,300	22,800
Crop Farm Workers	15,700	17,500

AGRICULTURE, FORESTRY AND FISHING

EDUCATION ATTAINMENT

Agriculture, Forestry and Fishing is an industry largely made up of workers employed in agribusiness. Most are farmers, living in regional Australia and managing their own properties. This is reflected in the high level of self-employment (around one in two workers, the highest percentage of any industry).

Around 43% of workers are aged 55 years or older (again, the highest of any industry). The need for formal qualifications is less common, with around half of this workforce having no post-school qualifications. Instead, practical skills and experience are more highly valued, with many of these skills being learnt on the job. Formal qualifications, though, can be gained through the VET sector which also contributes to this industry's skills. It is important to note, however, that technologically advanced production systems (i.e. farm automation, artificial intelligence) are becoming more common and the employers who use such systems will require more highly skilled workers.

When looking for work in this industry, seasonal work such as fruit picking is fairly common and may present short-term opportunities for job seekers of all ages.

ACCOMMODATION AND FOOD SERVICES

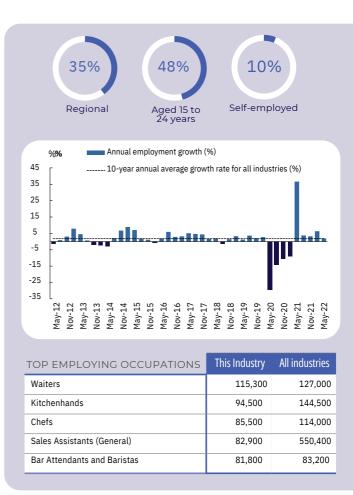

EDUCATION ATTAINMENT

Accommodation and Food Services provides many opportunities for young people looking for their first job, or for mature aged workers looking to re-enter the workforce. One in every three workers in Accommodation and Food Services live in regional Australia.

Almost half of all workers in the Accommodation and Food Services industry are between 15-24 years of age, the highest of any industry. Most entry level roles within this industry generally do not need prior experience or qualifications, with more than half of workers having no post-school qualifications.

Many occupations in this industry also provide flexible hours (around 61% of workers are employed part-time, the highest of any industry), allowing work around school and other commitments. There are employment opportunities within this industry across most occupation groups, and in all states and territories. If you are seeking work in Accommodation and Food Services, consider looking online as many employers in the industry use social media when recruiting.

ARTS AND RECREATION SERVICES

EDUCATION ATTAINMENT

Arts and Recreation Services includes art galleries, museums, and theatres. It also includes employers that offer sporting, recreation services, such as gyms, indoor sport centres or amusement centres.

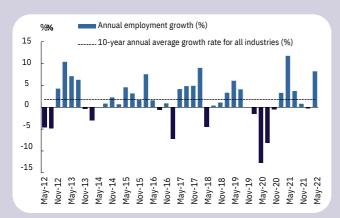

This is a relatively small employing industry, accounting for around 2% of Australian jobs. Employment in this industry fell over the year to May 2022, after recording a strong rise over the year to May 2021.

Arts and Recreation Services has a relatively young workforce (26% are aged 15 to 24 years), with workers most commonly employed as Community and Personal Service Workers (27% of employment) or Professionals (26%). This industry offers lots of opportunities for flexible work, with close to one in four workers self-employed, and around half employed part-time. Two-thirds of workers in this industry have post-school qualifications and most workers are based in the capital cities (75%).

25% 9% 22% Regional Aged 15 to 24 years Self-employed

Bus and Coach Drivers	40,300	47,400
Delivery Drivers	38,400	74,500

TRANSPORT, POSTAL AND WAREHOUSING

EDUCATION ATTAINMENT

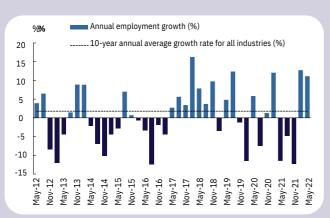

Transport, Postal and Warehousing is a diverse industry that revolves around the movement of people and goods by road, rail or air. Postal and courier services, warehousing and storage are also included.

Employment in the Transport, Postal and Warehousing industry grew strongly over the year to May 2022.

While qualifications are generally not needed for occupations in this industry (almost half of the workers do not have post-school qualifications), licences and tickets may be required. Examples include a forklift licence, truck/heavy vehicle licence, construction white card and 'working at heights' ticket.

Around one in every five workers is self-employed (22%) and around one in every five workers are employed part-time (22%), suggesting that there are options for contract work or flexible hours. This includes Bus and Coach Drivers, Delivery Drivers and Truck Drivers. Almost half (46%) of the workforce are Machinery Operators and Drivers for more information), with Truck Drivers accounting for most of these.

ELECTRICITY, GAS, WATER AND WASTE SERVICES

EDUCATION ATTAINMENT

23% 1%	41%	35%
No post- Other qual school qual	Cert III or Bac higher VET or h qual	chelor degree nigher

Electricity, Gas, Water and Waste Services is a relatively small employing industry, accounting for around 1% of Australian jobs. This industry covers electricity supply, generation, transmission and distribution, gas supply, water supply as well as sewerage and waste disposal. The electricity supply sector is responsible for the generation of electricity as well as its transmission and distribution. It is also responsible for arranging the sale of electricity via power distribution systems operated by others.

Employment growth in the Electricity, Gas, Water and Waste Services industry was very strong over the year to May 2022. With most of the nation's energy currently coming from the burning of fossil fuels, employment opportunities will exist moving forward as the industry identifies ways which will allow Australians to produce more of its electricity from renewable sources.

Just 7% of workers are aged 15 to 24 years and very few workers run their own business (6%). Around one in three workers live in regional Australia. This industry has a highly skilled workforce, with more than three quarters of workers holding post school qualifications of a Certificate III or higher qualification (76%). The VET sector is the main training pathway and entry into this industry is predominantly though the completion of an apprenticeship or traineeship. Information on VET pathways can be found on .

ADMINISTRATIVE AND SUPPORT SERVICES

EDUCATION ATTAINMENT

Administrative and Support Services is a small but essential industry which covers many services including office administration, debt collection, call centres, travel agencies, building cleaning, pest control and gardening services.

Annual employment growth in the Administrative and Support Services industry declined over the year to May 2022.

This industry provides good part-time employment opportunities, with 40% of the workforce employed in this manner. Around 12% of the workforce is aged 15 to 24, and around 30% of workers in the Administrative and Support Services industry run their own business, almost double the national average.

Many jobs also do not need post-school qualifications. However, while the share of workers without a post-school qualification in this industry is above the national average, more than half of all workers still have a certificate III or higher qualification. Some practical experience may be highly regarded by employers. Jobs like cleaning and gardening can be physically demanding and may not be suited to all job seekers.

TOP EMPLOYING OCCUPATIONS	This Industry	All industries
Commercial Cleaners	81,700	138,900

General Clerks	13,800	305,000

PUBLIC ADMINISTRATION AND SAFETY

EDUCATION ATTAINMENT

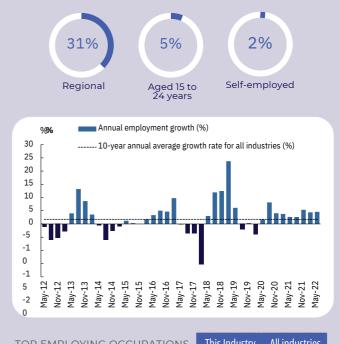

Public Administration and Safety includes federal, state and local government administration and services like the police force.

Employment in the Public Administration and Safety industry has increased steadily over the last two years. The increase in workers is potentially due to the development and implementation of support programs as part of the Australian Government's COVID-19 economic response, or equivalent state and territory government initiatives.

Just under 30% of workers are based in regional Australia, consistent with the national average across all industries.

This workforce is highly skilled (with three out of every four workers holding post school qualifications of a certificate III or higher), relatively old (just 5% are aged 15 to 24 years) and full-time work is common (84% of employment). Given this, there are fewer opportunities for entry level positions within this industry. All federal government departments, though, offer graduate programs for university graduates interested in a career in the Australian Public Service.

INFORMATION MEDIA AND TELECOMMUNICATIONS

EDUCATION ATTAINMENT

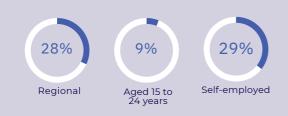

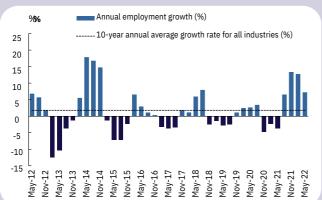

While Information Media and Telecommunications is a relatively small industry (representing around 2% of employment within Australia), it has a diverse profile and includes businesses such as newspaper and internet publishers, television and radio broadcasting, and telecommunications infrastructure and networks. While employment in this industry grew strongly over the year to May 2022, it has been generally declining over recent years.

Employment is mainly located in Sydney and Melbourne, but 18% of jobs are in regional Australia, and 15% run their own business. It is a highly skilled workforce, with almost three quarters holding post school qualifications of a certificate III or higher qualification. A relatively small proportion of workers are aged 15 to 24 (11%).

While qualifications are generally mandatory for the more technical roles, employers in some sectors of the industry (for example, publishing and broadcasting) may also see value if you can demonstrate your ability by showcasing a portfolio. Employers value prior experience and a portfolio is a good way to present evidence of your relevant skills and abilities.

Workers in this industry are typically interested in journalism, creative and technical writing, photography, video and music production and backstage production services, as well as computer programming, engineering and related technical and electronic support.

TOP EMPLOYING OCCUPATIONS	This Industry	All industries

MANAGERS

There are over 1.7 million Australians employed in Manager roles across the country. These occupations can be very diverse and Managers work across many different types of organisations and industries.

Are qualifications or experience needed?

This is a relatively skilled group, as Managers generally hold senior positions, taking responsibility for staff and operations. This means qualifications and experience are usually needed, however, sometimes significant on-the-job experience is sufficient.

The majority of Managers hold post-school qualifications, although this is less common for Farmers and Farm Managers and Hospitality, Retail and Service Managers.

The need for workplace experience is reflected in the age profile of the workforce. More than half of all Managers are aged 45 years or older. Just 3% are aged 15 to 24 years, although there are more opportunities for young people in Hospitality, Retail and Service Manager positions (accounting for 7% of this group), in roles such as Amusement, Fitness and Sport Centre Managers or Conference and Event Organisers. Managers are typically skilled in communication and building relationships, planning, budgeting and problem solving.

In which industries do managers work?

Managers work in every industry, but the largest shares are in Retail Trade and Agriculture, Forestry and Fishing (12% and 10% respectively).

Other major employing industries include Manufacturing, and Professional, Scientific and Technical Services (both 9% respectively) as well as Construction and Accommodation and Food Services (both 8% respectively).

Some Manager occupations are concentrated in specific industries. For example, Café and Restaurant Managers are mainly employed in Accommodation and Food Services. For other Manager occupations, such as General Managers and Human Resource Managers, employment is spread across all industries.

Are there job opportunities?

When looking for Manager vacancies, remember they are not always advertised online. Some positions are filled by the promotion of existing workers, while others are advertised in less formal ways such as word of mouth or head hunting. It is important for job seekers who are looking for Manager positions to remember this and use professional networks to help bolster their recruitment chances.

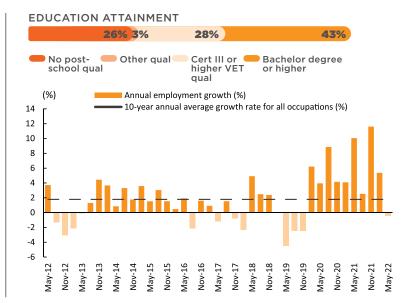

Will there be future opportunities?

Mangers often perform a range of non-routine, cognitive duties (such as problem solving) so this occupation group is less susceptible to automation.

Jobs by occupation

PROFESSIONALS

Professionals is the largest employing occupation group in Australia (accounting for around one in every four workers).

There are clear differences in the representation of men and women across occupations in the Professionals group. Around 73% of Health Professionals and 71% of Education Professionals are female, but 79% of ICT Professionals are male. The extent of part-time employment also varies, being relatively rare for ICT Professionals but more common for Arts and Media Professionals, Health Professionals, and Education Professionals.

Are qualifications needed?

Most Professional jobs require a bachelor degree or higher qualification (79% of Professionals have this level of qualification), so university study is the main pathway for employment. Reflecting the time it takes to gain relevant qualifications, a relatively small proportion of Professionals are aged 15 to 24 years (7%). Arts and Media Professionals are the most likely to be in this age group (10% are aged 15 to 24).

In addition to qualifications, skills that are often required to be a Professional include communication, planning, project management, problem solving, writing and research.

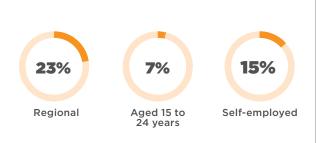

Are there job opportunities?

There will continue to be job opportunities for Professionals. Along with the rising demand for these workers, the supply of university educated Australians is also increasing, with higher education enrolments increasing significantly over the past decade. With more university graduates, and more people searching for work, there are now large numbers of qualified applicants competing for some Professional occupations.

With increased competition, job seekers are encouraged to be as flexible as possible with their availability and highlight their transferable skills and experience. Employers will be looking for reliable and flexible workers, with good communication skills who can learn new tasks quickly and adapt to new working environments. If you can, give examples from your work history which highlight these skills and can help you stand out from the crowd

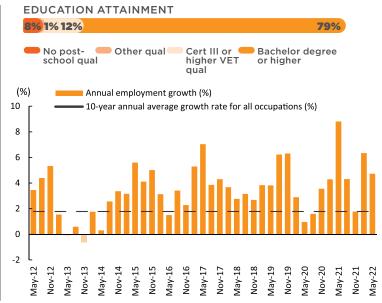

In which industries do Professionals work?

Around two thirds of Professionals are employed in just three industries: Health Care and Social Assistance (23% of Professional employment), Professional, Scientific and Technical Services (21%) and Education and Training (20%).

TECHNICIANS AND TRADES WORKERS

Technicians and Trades Workers undertake a variety of skilled manual tasks. They apply technical, trade or industry specific knowledge in construction, manufacturing, scientific, engineering and other activities. Regional employment is fairly common with more than a third of workers employed across regional Australia.

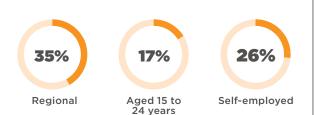

A relatively large proportion of this group are self-employed (26%), particularly Construction Trades Workers (45%), and full-time work is common.

Technicians and Trades Workers has the second lowest percentage of female workers of any occupation group (17%). This is especially apparent for Automotive and Engineering Trades Workers, Construction Trades Workers, and Electrotechnology and Telecommunications Trades Workers with women representing 3% or less of these workforces. That said, there are still more than 20,000 females working in these trades. There are also a number of Technicians and Trades Workers occupations that have large shares of female workers, such as Veterinary Nurses (98%) and Medical Technicians (73%).

What qualifications and skills are needed?

Around 60% of Technicians and Trades Workers hold a certificate III or higher vocational qualification, with apprenticeships and traineeships providing a key training pathway for many occupations in this group.

Common skills that are needed include technical and trade specific skills (such as welding and cooking), along with general employability skills that are valued across most occupations (such as communication, planning and problem solving).

Top employing occupations

Electricians	175,700
Carpenters and Joiners	144,900
Motor Mechanics	114,800
Chefs	114,000
Metal Fitters and Machinists	110,400

In which industries are Technicians and Trades Workers employed?

Construction accounts for the largest share of these workers (33%), followed by Other Services (which includes automotive repair and maintenance) (14%) and Manufacturing (13%).

Are there job opportunities?

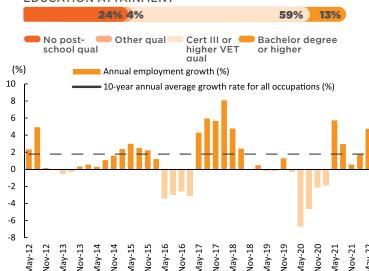

Public infrastructure projects will continue to fuel demand for the Construction industry, including Technician and Trades Workers.

Many vacancies for Technicians and Trades Workers can be advertised informally. When seeking work in this occupation, it pays to be proactive by approaching employers directly (e.g. by email or by phone and reaching out through your network of family and friends). Importantly, employers are increasingly using social media to recruit for Technicians and Trades Workers (up from 19% of employers in 2020 to 29% in 2021), make sure you are checking for job vacancies on social media (including jobs groups on Facebook).

Will there be future opportunities?

Demand is likely to be ongoing for Technicians and Trades Workers. Given their role within the economy, there will always be demand for those workers who can build, construct, fix and mend. While there may be automation for some routine tasks, many occupations involve non-routine or unpredictable duties which are more difficult to automate.

Jobs by occupation

COMMUNITY AND PERSONAL SERVICE WORKERS

Community and Personal Service Workers provide a wide range of services, including in the areas of aged and disability care, health and social welfare, child care, hospitality, policing, tourism and sports. Employment is largely concentrated in four industries, with 43% employed in Health Care and Social Assistance, 17% in Accommodation and Food Services, and 13% in both Education and Training, and in Public Administration and Safety. Workers are mainly female (69%) and part-time employment is common (54%), although there are differences by subgroup. For example, Protective Service Workers (which includes Police, Fire and Emergency Workers and Security Officers and Guards) is largely a male workforce (78%) and has a relatively low level of part-time employment (11%).

Are qualifications needed?

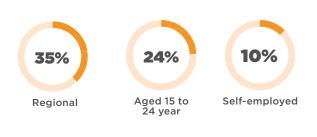

Entry pathways are varied, reflecting the diverse range of services provided by workers in this group. Around 43% of workers have a certificate III or higher vocational qualification, 32% do not hold a post-school qualification and 21% have a bachelor degree or higher. Health and Welfare Support Workers (which includes Ambulance Officers and Paramedics and Dental Hygienists, Technicians and Therapists) is the most highly educated subgroup, with over 90% holding post-school qualifications.

Are there job opportunities?

Some occupations in this group provide good entry level employment opportunities. For example, young workers (aged 15 to 24 years) account for 62% of Hospitality Workers and post-school study is often not needed for these jobs. It is important that you also remember to check the websites of big employers (as many will only advertise jobs on their own websites) as well as recruitment websites (particularly for the health care sector) and job boards. Employers recruiting for Community and Personal Service Workers are the most likely to use social media to recruit (including jobs groups on Facebook), so keep this in mind when looking for work.

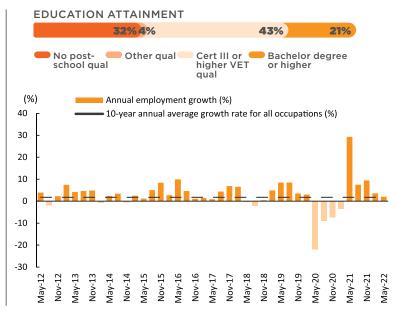

Will there be future opportunities?

Jobs in this group typically require a high degree of interpersonal and communication skills, which are difficult to automate. With most of the workers in this occupation employed in Health Care and Social Assistance, future demand is expected to be driven by population growth, as well as an ageing population.

Top employing occupations

Aged and Disabled Carers	288,200
Waiters	127,000
Child Carers	125,600
Education Aides	106,000
Nursing Support and Personal Care Workers	105,000

CLERICAL AND ADMINISTRATIVE WORKERS

Clerical and Administrative Workers provide support to businesses by organising, storing, manipulating and retrieving information. Employment is spread widely across industries but most jobs are likely to be office-based.

This workforce is mainly female, with women accounting for 73% of these workers. Within this group, though, there is some variation with women making up 94% of Personal Assistants and Secretaries but only 41% of Clerical and Office Support Workers. The age profile of this occupation is relatively old, with close to a quarter of workers aged 55 years or older.

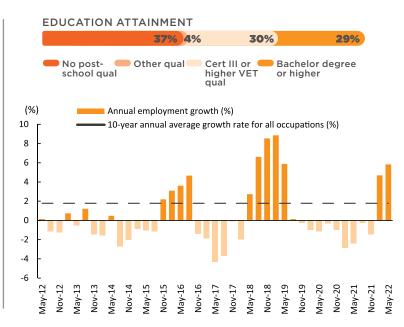

Top employing occupations

General Clerks	305,000
Receptionists	193,100
Contract, Program and Project Administrators	138,700
Office Managers	137,100
Accounting Clerks	129,900

There are also opportunities in this group for workers who do not hold post-school qualifications, with more than a third of this group not having completed further study.

Competition for these positions can be fierce, with employers recruiting for Clerical and Administration Workers typically receiving the highest number of average applicants per vacancy of all the occupation groups. For advice on how to stand out from the crowd, please see page 6.

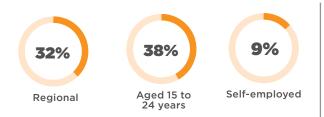

SALES WORKERS

Sales Workers sell goods, services and property, and provide sales support. A large share of these workers is employed in Retail Trade (59%).

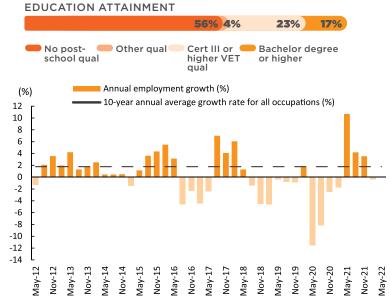

Few jobs in this group require post-school qualifications and the workforce is relatively young (38% are aged 15 to 24 years). These jobs are often people's first employment and the seven day a week trading hours of many retail stores create part-time employment opportunities for students (56% of jobs are part-time).

Jobs are often advertised through informal methods, while some vacancies are filled through applicants approaching employers for work. Research by the National Skills Commission (NSC) indicates that more than one in five employers looking to hire Sales Workers may not advertise their vacancies, instead relying on word of mouth or recruiting the job seekers that approach the business looking for work. Social media is also increasingly being used to recruit for Sales Workers.

Top employing occupations

Sales Assistants (General)	550,400
Checkout Operators and Office Cashiers	140,200
Real Estate Sales Agents	96,700
Sales Representatives	62,800
Motor Vehicle and Vehicle Parts Salespersons	43,300

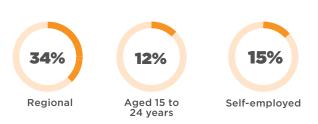

Jobs by occupation

MACHINERY OPERATORS AND DRIVERS

Machinery Operators and Drivers operate machines, vehicles and are mainly employed in Transport, Postal and Warehousing, Manufacturing and Mining. More than one third of workers are employed in regional Australia.

Post-school qualifications are often not essential to gain employment in this group. However, the hazardous nature of some occupations may require tickets and/or licences to illustrate you have undertaken the proper training to keep yourself and your colleagues safe while successfully performing your job.

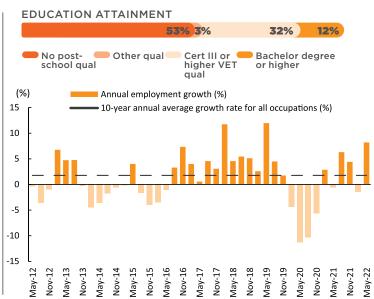

Employers value skills such as communication, teamwork, problem solving, creativity and initiative. If you are considering working in this area, it may pay to look beyond recruitment websites.

Top employing occupations

Truck Drivers	199,900
Storepersons	148,300
Forklift Drivers	74,700
Delivery Drivers	74,500
Drillers, Miners and Shot Firers	58,700

While over half of recruiting employers use recruitment websites and jobs boards to hire Machinery Operators and Drivers, jobs are also relatively frequently not advertised, with employers filling them through their own contacts or through jobs seekers who approach them directly. In addition, around one in five employers use social media when hiring Machinery Operators and Drivers. This occupation group is mostly male (88% of the workforce). Within this group though, there is some variation, with females accounting for 27% of people employed as Storepersons.

LABOURERS

Labourers perform a variety of routine and repetitive physical tasks. Some Labourer jobs require physical fitness (like Building and Plumbing Labourers) but not all involve heavy work (for example, Fast Food Cooks).

Most Labourer positions do not generally require post-school qualifications. Further, more than a quarter of workers (27%) are aged 15 to 24 years and part-time work is common. Accordingly, there are good opportunities for young people to gain work experience or combine work with study.

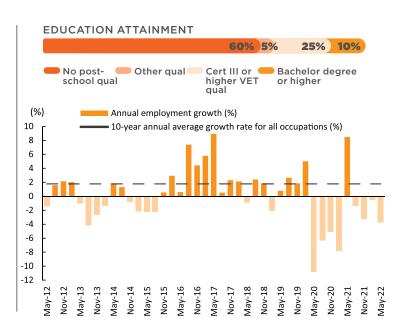

There are also opportunities for workers across Australia, with 40% of Labourers employed in regional areas. While formal qualifications are not necessarily a requirement for these roles, some may require mandatory tickets or licences to illustrate you have undertaken the proper training to keep yourself and your colleagues safe while successfully performing your job. In addition, job seekers will generally need to possess a driver licence and their own transport.

Top employing occupations

Kitchenhands	144,500
Commercial Cleaners	138,900
Shelf Fillers	63,600
Fast Food Cooks	63,100
Other Miscellaneous Labourers	61,900

Jobs in this group are often advertised informally, with many being filled by applicants approaching the employer directly. Almost 40% of employers who recruit for Labourers use word-of-mouth. If you are looking for work in these occupations, consider speaking to friends, family and your broader network about opportunities. There has also been an increase in the proportion of employers using social media when hiring Labourers (to 24% of employers in 2021).

Occupational matrix

GUIDE TO THE OCCUPATION MATRIX

HOW DO I USE THE MATRIX?

Employment and training decisions should be made after consideration of all relevant issues, including aptitude, interests, expectations about pay and working conditions, training requirements and goals.

The Occupation Matrix includes summary statistical information for around 350 occupations, which can provide useful background, but it needs to be read in conjunction with other occupational resources.

Titles in the Matrix have been grouped into broad categories based on field of work to assist users to better explore the labour market. There are 21 groupings.

- Accounting, Banking and Financial Services
- Administration and Human Resources
- · Advertising, Public Relations, Media and Arts
- Agriculture, Animal and Horticulture
- Automotive, Transport and Logistics
- Construction, Architecture and Design
- Education and Training
- Electrical and Electronics
- · Engineers and Engineering Trades
- Executive and General Management
- Government, Defence and Protective Services
- Health and Community Services
- · Hospitality, Food Services and Tourism
- Information and Communication Technology (ICT)
- Legal and Insurance
- Manufacturing
- Mining and Energy
- Personal Services
- Sales, Retail, Wholesale and Real Estate
- Science
- Sports and Recreation

Some titles appear in more than one category.

The relevant occupation major group is listed in brackets after each occupation title.

Кеу	Occupation
M	Managers
P	Professionals
TT	Technicians and Trades Workers
СР	Community and Personal Service Workers
CA	Clerical and Administrative Workers
SW	Sales Workers
МО	Machinery Operators and Drivers
T	Labourers

EMPLOYMENT MAY 2022 AND 5 YEAR (EMPLOYMENT) CHANGE TO MAY 2022

The employment information gives the total number of people employed in the occupation at May 2022. It includes both full-time and part-time workers.

Employment change refers to levels of employment increasing or decreasing, as well as the percentage change, over the five years to May 2022.

Data Source: ABS, Labour Force, seasonally adjusted

WORKING PART-TIME

This column shows the proportion of workers in the occupation who work part-time. The information uses the ABS definition of part-time, which is working less than 35 hours per week.

Data Source: ABS, Labour Force, annual averages of original data

FEMALE

This shows the proportion of those employed in the occupation who are female.

Data Source: ABS, Labour Force, annual averages of original data

AGED 15 TO 24 YEARS

This shows the proportion of those employed in the occupation who are aged 15 to 24 years.

Data Source: ABS, Labour Force, annual averages of original data

UNEMPLOYMENT RATE

The unemployment rate is the number of unemployed persons as a percentage of the labour force (employed plus unemployed). The unemployment rate is presented in three categories: below average, average and above average. These categories are based on the occupation's average unemployment rate in the year to May 2022 relative to the average across all occupations.

Occupational unemployment rates do not reflect underutilised skills (such as an Accountant working as an Accounting Clerk).

The occupational unemployment rate may be lower than the published national unemployment rate as it does not include first-time job seekers and those who have not worked full-time or part-time in the past two years. An occupation may have a high unemployment rate but also be experiencing shortages for particular skills.

Data Source: ABS, Labour Force, annual averages of original data

MEDIAN EARNINGS

Median weekly earnings are before tax and are for full-time workers. The median earnings ranges are for all ages and levels of experience. They are indicative only and cannot be used to determine what a worker will actually earn. Data are not available for all occupations.

Key Earnings	
\$	< \$1,153 (below the 20th percentile)
\$\$	\$1,153 - \$1,428 (in the 20th to 40th percentile)
\$\$\$	\$1,429 - \$1,782 (in the 40th to 60th percentile)
\$\$\$\$	\$1,783 - \$2,304 (in the 60th to 80th percentile)
\$\$\$\$\$	> \$2,304 (above the 80th percentile)

Data source: ABS Survey of Employee Earnings and Hours, May 2021

NO POST-SCHOOL QUALIFICATION

The figures are a percentage of those employed in the occupation who have not completed education other than pre-primary, primary or secondary education.

Data Source: ABS, Survey of Education and Work

PROJECTED EMPLOYMENT CHANGE

This presents the percentage change in employment projected over the five years to November 2026.

A large projected percentage growth in a small occupation can yield fewer new jobs than low projected growth in large occupations. For example, 20% projected growth in an occupation that employs 300 people will create 60 new jobs. However, 5% projected growth in an occupation that employs 10,000 people will provide 500 new jobs.

These estimates do not provide any guidance about the number of job seekers in each occupation. Although there may be a large number of new jobs, there may be strong applicant competition for available positions.

Data Source: National Skills Commission, Employment Projections

USEFUL WEBSITES AND LINKS

YOUR CAREER

yourcareer.gov.au/

The National Careers Institute has developed the Your Career website to assist Australians of all ages and circumstances better plan and manage their career. Your Career helps people find careers information and advice, and acts as a single source of careers information for all Australians. Visit the Your Career website to be connected to further education, training or work options to support your current career needs or goals.

MY SKILLS

myskills.gov.au/

My Skills website is an Australian Government initiative to provide access to current, straightforward, independent and trustworthy information helping individuals make choices about their training options. As the national directory of vocational education and training (VET) organisations and courses, My Skills strives to improve the quality and accessibility of information available for VET consumers and provides the ability to search for, and compare, VET courses and training providers.

LABOUR MARKET INFORMATION PORTAL

lmip.gov.au/

The Labour Market Information Portal (LMIP) brings together data from a range of official sources to help you understand your local labour market.

LITTLE RIPPLES

yourcareer.gov.au/get-career-resources/little-ripples

Research suggests that children are already starting to make subconscious decisions about their future abilities and opportunities from as young as seven. This is why it's so important to start creating the right Little Ripples early, helping to shape children's future happiness, lives and careers.

TRAINING.GOV.AU

training.gov.au

Training.gov.au is the National Register on Vocational Education and Training (VET) in Australia. The site provides information on training packages, qualifications, courses, units of competency and Registered Training Organisations.

NCVER

ncver.edu.au/

The National Centre for Vocational Education Research (NCVER) is the national professional body responsible for collecting, managing, analysing and communicating research and statistics on the Australian vocational education and training (VET) sector.

QUALITY INDICATORS FOR LEARNING AND TEACHING

qilt.edu.au/

QILT are a suite of government endorsed surveys for higher education, across the student life cycle from commencement to employment. QILT makes available robust, nationally consistent performance data for Australian higher education, helping drive quality improvement.

WHAT'S NEXT

whatsnext.dewr.gov.au/

What's Next? helps you decide what to do if you have been retrenched or are looking for a new career. There is help for finding a job, getting some training and looking after yourself. The choice is yours.

AUSTRALIAN APPRENTICESHIPS

australianapprenticeships.gov.au/

The Australian Apprenticeships website provides information on apprenticeships and traineeships, including factsheets and links. An Australian Apprenticeship offers job seekers the opportunity to explore a new job, gain new skills, work flexible hours and receive a qualification. Eligible employers can receive financial incentives to help take on an apprentice, particularly if the apprenticeship is in a trade experiencing a skill shortage.

WORKFORCE AUSTRALIA

workforceaustralia.gov.au/

Workforce Australia is the employment service delivered by the Department of Employment and Workplace Relations. Workforce Australia includes a new online service and a network of providers to deliver personalised support. Workforce Australia helps Australians find and keep a job, change jobs or create their own job.

TRANSITION TO WORK

dewr.gov.au/transition-work

Transition to Work helps young people aged 15-24 into work (including apprenticeships and training) or education. Transition to Work participants receive intensive, pre-employment support to develop practical skills to get a job, connect with education or training, find local job opportunities and connect with relevant local community services.

DISABILITY EMPLOYMENT SERVICES

dss.gov.au/our-responsibilities/disability-and-carers/programmesservices/disability-employment-services

Disability Employment Services help people with disability find work and keep a job. Through Disability Employment Services, people with disability, injury or health condition may be able to receive assistance to prepare for, find and keep a job.

COMMUNITY DEVELOPMENT PROGRAM

niaa.gov.au/indigenous-affairs/employment/cdp

The Community Development Program (CDP) is a remote employment and community development service administered by the National Indigenous Australians Agency. CDP supports job seekers in remote Australia to build skills, address barriers to employment and contribute to their communities through a range of flexible activities. It is designed around the unique social and labour market conditions in remote Australia.

Job Prospects in Australia

Australia offers a diverse range of job prospects across various industries. The healthcare sector has a consistent demand for skilled professionals such as doctors and nurses, while the booming Information Technology (IT) industry seeks software developers and cybersecurity experts. With a rich abundance of natural resources, the mining and resources sector provides opportunities for engineers and geologists. Ongoing construction and infrastructure projects contribute to a demand for construction professionals, architects, and engineers. Education and training positions are available for teachers and administrators, and the tourism and hospitality industry offers diverse roles. Additionally, Australia's focus on sustainability has led to job opportunities in renewable energy. Salaries vary widely depending on factors such as industry, experience, and location, with professionals in fields like finance, agriculture, and manufacturing also finding promising prospects. To obtain the most up-to-date information on job opportunities and salary ranges, individuals are advised to consult current sources and industry reports.

Job roles	Average Salary in CAD per year*
Healthcare	AUD 70,000 to AUD 200,000.*
Information Technology (IT)	AUD 60,000 to AUD 150,000.*
Mining and Resources	AUD 80,000 to AUD 150,000.*

Cost of Living in Australia

The cost of living in Australia varies based on several factors, including location, lifestyle, and individual circumstances. In major cities like Sydney and Melbourne, living expenses are generally higher compared to other regions. Housing constitutes a significant portion of the cost, with rent prices varying widely depending on whether one chooses to live in the city center or the outskirts. A one-bedroom apartment in the city center may range from \$1,800 to \$3,000 per month. Utilities, including electricity, heating, cooling, water, and garbage, typically cost between \$150 and \$250 per month for a standard apartment. Grocery expenses for a single person may range from \$300 to \$500 monthly. Transportation costs, encompassing public transport, fuel, and maintenance for a car, can vary from \$100 to \$250 per month. Health insurance, if not covered by the public Medicare system, may add an extra \$50 to \$200 or more. Internet and mobile phone services typically amount to \$60 to \$100 per month. While these figures provide a general overview, it's important to note that individual spending habits, such as dining out and entertainment, can significantly impact overall living costs. It's advisable to consult up-to-date sources for the latest information on the cost of living in Australia.

Expenses

Accommodation

- · Shared accommodation
- One-bedroom apartment (city center)
- One-bedroom apartment (outside city center)

Utilities

• electricity, heating, cooling, water, garbage

Groceries

Transportation

• public transport, fuel, and maintenance for a car
